

# Experiment Setting

- hardware specification
  - computation hardware: (cpu) intel i5
- package version
  - torch 2.0.1
  - torchvision 0.15.2
  - python 3.10
  - matplotlib 3.8.0
- all the experiment parameters and details
  - model detailed parameters: as given
  - epsilons = [.15, .2, .25, .3]
  - The execution results of T12902101\_a2.py
